

## EXTREME

Regular training and the stress of competitions on your horse increases its nutritional requirements. A diet plan that contains plenty of energy, vitamins and fatty acids is required. EXTREME is the perfect diet for tournament horses. It provides your horse with the nutrients it needs to perform at its best.

With EXTREME, you can be sure that all of your horse's nutritional needs are covered during intense work. The feeding solution is designed for high performer.

EXTREME is our commitment to the outstanding performance of your horse.

## TRADIMASH

TRADIMASH is a tasty and beneficial supplementary feed for horses during recovery phase or sporting activities, but also as a weekly supplement to the normal basic feed.

TRADIMASH facilitates digestion in periods of stress during competitions, transportation or stable changes. Based on wheat bran, flaxseed, carrots and fruit pulp, TRADIMASH is also enriched with various vitamins and trace elements.

## PURE CARE

Lifestyle, genetic selection, training, traveling, competitions and other stressful situations to which horses are regularly exposed are factors that weaken the health of the digestive system and make horses increasingly sensitive to their feed.

Granovit developed PURE CARE in order to the needs of these sensitive horses and to offer them a suitable, easy-to-use feed. PURE CARE is the ideal feed for horses that are sensitive to non-structured carbohydrates, easily excitable and irritable, suffer from chronic laminitis, gastric ulcers, blood loss and Cushing's syndrome.

The energy contained in PURE CARE comes mainly from raw materials rich in crude fiber, selected for their high digestibility, and vegetable oil rich in omega-3 essential fatty acids (linseed and soy). These are safe and healthy sources of energy for your horse's digestive system. The unique composition makes it possible to maintain the energy level of the feed without the addition of cereals.

The proportion of starch and sugary components is limited and controlled. The total content of NSC Horse (non-structured carbohydrates, including starch and sugar) in PURE CARE is limited to 10%, which makes it a feed with a low glycemic index compared to conventional flake feeds (25-30% NSC).

Horse feed

## OUR PHILOSOPHY

We work closely with breeders and riders in order to adapt our product formulations to the physiological needs of horses. Our feed has a guaranteed level of amino acids, minerals and vitamins. They also contain fiber, starch and fats in a balanced and highly palatable form.

### IMPECCABLE QUALITY

Product quality is at the heart of Granovit's approach. Granovit feeds are made from first-class, controlled raw materials and respect the most demanding standards that apply in horse feeding. Our production process is ISO 9001:2015 certified, which guarantees quality throughout the entire supply chain.

We also check the freshness of the raw materials and ensure the traceability of the components. And finally, we work according to HACCP (Hazard Analysis/Critical Control Point) guidelines to maintain our high standard of hygiene.

Choosing one of our products gives you the assurance of impeccable quality. This is the result of our passion for good work and our commitment to customer satisfaction.

«OUR APPROACH IS TO UNDERSTAND THE HORSE'S METABOLISM AT DIFFERENT STAGES OF ITS LIFE IN ORDER TO PROVIDE NUTRITIONAL SOLUTIONS THAT OPTIMISE PERFORMANCE AND MAINTAIN HEALTH THROUGHOUT ITS LIFE.»

Dr Roy Johnson, Horse nutritionist

5295 Equidiams Mineral	Pellets 3 mm	Sport, breeding and growth	Minerals, trace elements, vitamins and biotin					
5299 Horsebloc	Horse block	Maintenance	Minerals and trace elements					

## MARE & FOAL

For pregnant or lactating mares and their foals from birth to one year of age.

During the last three months of pregnancy and the lactation period, mares and foals need high quality protein rich in amino acids. These are necessary for the growth and development of the foal.

The addition of probiotic active ingredients promotes digestion. Mare and Foal is the ideal diet for mares in the lactation period - for healthy foal growth.

## SENIOR

Senior meets the increased requirements of horses over 15 years of age and facilitates the transition to senior status. It is based on cereal flakes, specially digestible fibers (sugar beet pulp, wheat bran, alfalfa) and easily digestible protein sources.

This food is enriched with 9 vitamins (with added vitamin C) and trace elements. It contributes to excellent vitality.

Senior strengthens the immune system, promotes weight gain and regulates intestinal transit.

## BENEFITS

### VITALITY

The intake of vitamins, iron and selenium promotes both vitality and a strong immune system.

### DIGESTION

The live yeast culture promotes the balance of the intestinal flora and improves the digestion of fibers.

### SKIN AND FUR

The addition of soybean oil and extruded linseed ensures the ideal content of omega 3 and 6 essential fatty acids, which promote healthy skin and a shiny coat.

### EXERCISE

An increased supply of magnesium contributes to muscle relaxation. The supply of natural antioxidants and vitamin E helps to reduce the oxidative stress caused by exertion.

### MUSCULATURE

The levels of methionine and lysine have been optimized. Both amino acids play a key role in the development of your horse's muscles.

### FREE

Pure Care is formulated without oats, corn, barley, molasses, or added sugar.

### TRI ENERGY CONCEPT

With regard to the health of your horse's digestive system, the energy content of the Mare and Foal, Senior and Extreme compound feeds is based on three energy sources: flaked cereals with predigested starch, fibers specially selected for good digestibility and the addition of vegetable oils that provide a lot of energy.
